

We're nearly there!!!

Just a few more months.....and Nicole's dream will be realised.

Last week, Pradyut and Bishnu went to Calcutta and checked on the chassis of our mobile bus. The Chassis has now arrived at Burdwan and the manufacturing of the bus body has started. This should be finished about Christmas.

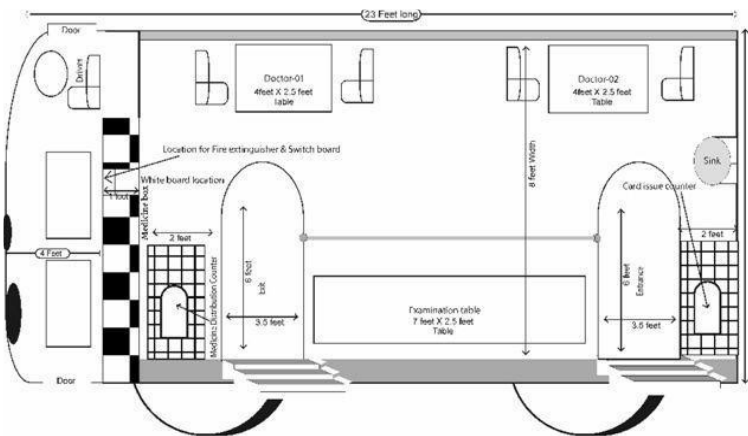

Our founder, Nicole Cunningham, had a dream to provide a Mobile Healthcare Bus to service the villages surrounding Mayapur. Nicole's original idea has been and still is in the forefront of our minds at all times.

Once we have paid for the bus, the cost of running and maintaining it will be the same as the cost of hiring the car, so our monthly overheads will remain the same.

The advantage of having the bus is that our staff will not have to transport the medical supplies, tables and chairs etc and set up the clinic each morning in makeshift buildings, or out in the hot sun. The bus will also provide privacy for the patients.

Here we have a sketch of the interior of the bus we have ordered. This will have 2 doctor stations, an examination table with privacy curtains, separate entry and exit doors, medicine storage, dispensing counter and sink. We are so excited as this part of Nicole's dream becomes a reality.
